Kitchen Counter	404	807	1614	2421
Hobbies (sewing, model building)	538	1076	2152	3228

source : Lamps USA

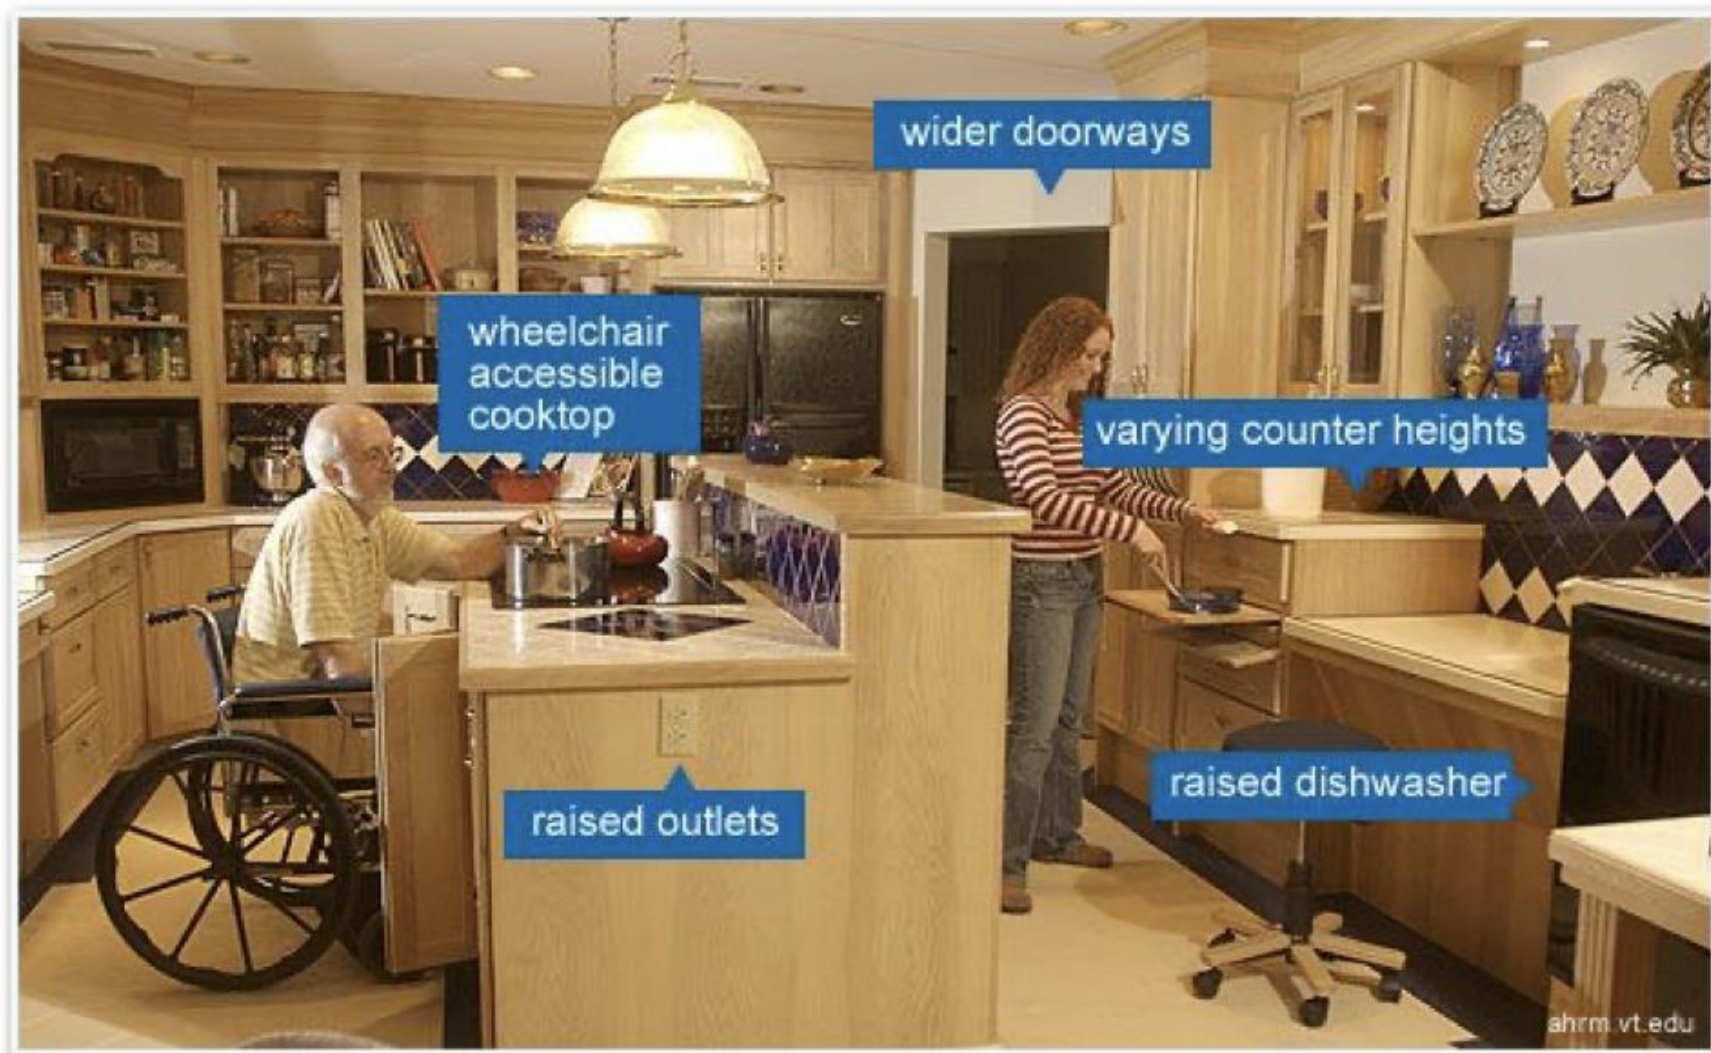

How well lit are the danger zones: stairs, bathrooms, kitchens?

- 1) replace light bulbs**
- 2) Use LEDs or consider full spectrum bulbs which increases contrast, clarity while decreasing glare**
- 3) avoid lamps with direct sight of bulb.
Instead use lamps (torchieres) that project light.**
- 4) Change wall color.
Dark walls absorb light and can require 4x more light.
Glossy paint creates glare.
Matte paint reduces glare**
- 5) Lamps with GOOD, REACHABLE light switches
if not, try a clapper,
or wire outlets so they are controlled by a wall switch
or hook up to wifi programs**
- 6) Theater lighting for stairs**
- 7) LED strips under kitchen cabinets**
- 8) Open up the curtains!**
- 9) Use outlet covers with night lights**

Transversing levels

3 ways to get from one level to another, be it inside or outside

Ramps

Stairlifts approximately \$4000 for a straight
\$12,000 plus for a curved

VPL - Vertical Power Lift

perhaps \$12,000 in a garage to \$35,000 + for removing stairs and installing.

Raizer II assist lift

Scooters

Power Wheel Chairs

FDA Class II Medical Device*
